

## **HARTEK POWER COMMISSIONS 3 SUBSTATION FOR 38 MW SOLAR PLANTS.**

**July 1, 2015:** "The company has commissioned three substations on complete EPC basis for 38-MW solar power projects worth about Rs 220 crore in Punjab and Chhattisgarh in the first quarter of financial year 2015-16," Hartek Power said in a statement.

The Chandigarh-based company has commissioned two substations in Punjab, including a 66/11-KV substation for a 4-MW solar plant in Hoshiarpur for Aditya Medisales (Sun Pharma Group) and a 66/11-KV substation for a 4-MW solar project in Nabha awarded to Earth Solar.

Hartek Power is holding final-stage talks for executing substations for close to 200-MW solar projects in India in the current financial year.

Having constructed more than 100 substations in the past seven years, Hartek Power is operating projects in 17 states across the country. The company has also won substation orders worth Rs 60 crore from various state electricity boards, which will be executed in the current financial year
