

# Excellence in Manufacturing Power Distribution Products

## Control & Relay Panel

HARTEK India is a leading provider of control and relay panels up to 220 KV, offering quality solutions for various industries such as substation, power utilities, and more. With both standard and customized options available, we prioritize quality, reliability, and efficiency. Our in-house R&D team focuses on innovation and custom designs, ensuring spacious and maintenance-friendly arrangements for cable termination.

## Compact Substation (CSS)

A compact solution for your power distribution needs. Our package substations come in a variety of ranges, including 12KV, and include MV switchgear, distribution transformer, and LV switchboard. They offer low space requirements, easy installation, and personnel safety.

## Low Voltage Switchboard Panel

HARTEK India offers customizable low voltage switchgear panels that comply with the IEC 61439 standard, including TTA and PTTA LV panels. Our panels optimize space, ensure safety, and synchronize easily with surrounding panels. Our in-house experts handle all aspects of design, manufacturing, testing, and commissioning for top-quality products.

## Medium Voltage Switchboard Panel (Vacuum Circuit Breaker Panel)

As a leading provider of 11KV-33KV medium voltage panels, we offer safe and reliable technology for electricity distribution. Our custom-designed panels meet IEC 62271-200;2011 standards, with compact construction for minimum weight and space. The drawable design for breaker and PT's ensures ease of maintenance and personnel safety. Expert in-house R&D team focuses on innovative and customized design for optimal quality, reliability, and efficiency.
